

Another Version of the Clarity Statement Used At Home Groups

We believe it helps when we use the NA language of recovery in all that we say in this meeting. That is; we prefer to refer to our disease as addiction and identify ourselves as addicts.

We refer to our time in this program as clean time or recovery.

We do this because with the first step of NA we have shifted the focus off any specific drug and onto the recovery process leaving us with the single focus necessary for unity.

Any labels which imply specific drugs or more than one disease dilutes that focus and some of the unity called for in NA's first tradition is lost. This is not something we enforce; we are just letting you know what seems to work for us.
