

ADDENDUM #3

FELLOWSHIP MEDALLIONS

The World Service Conference meeting in April 1984, authorized the World Service Office to include a variety of literature items in the inventory, including medallions. The office has received a continuous number of requests for medallions, as many do not use or like the key tags or chips that are very prevalent. The WSO Board concurred with the directive from the Conference, but felt that the Fellowship should make a decision on what message should be contained on the medallion. A number of options were suggested, and the best suggestions are shown below from which one design should be selected.
